

APX M-S3 Cascading Communication Cable Instruction Manual

1. Materials Bill

A

A Parallel communication cable *1

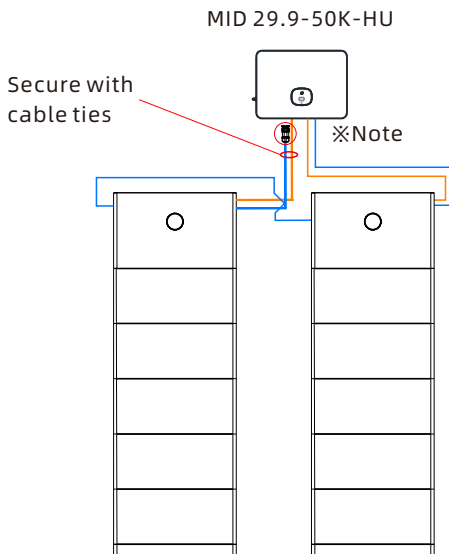

B

B Waterproof plug *1

2 Instructions for Use

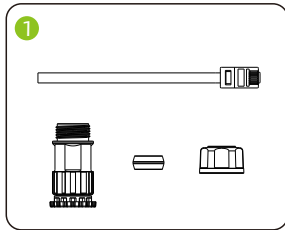

For the MID 29.9-50K-HU inverter, when batteries are used in multi-cluster, use the "Parallel communication cable" (A) for inter-cluster communication. Then, connect the "APX→INV communication cable" from only one cluster to the inverter. For the remaining cluster(s), seal the corresponding cable with the supplied waterproof plug (B).

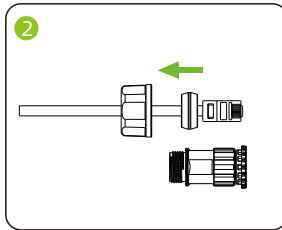

※Note:

For the MID 29.9-50K-HU inverter, when batteries are used in multi-cluster, connect the "APX→INV communication cable" from only one cluster to the inverter. For the remaining cluster(s), seal the corresponding cable with the supplied waterproof plug.

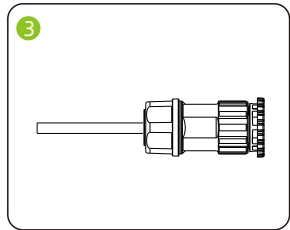

Method of installing the waterproof plug (B):

1 Remove the plug and take it apart.

2 Thread them onto the string one by one.

3 Tighten the lid.
